

First elevated highway on single pillar support stares at a year's delay

Gurgaon: Two weeks into Unlock 2.0, work on India's first eight-lane elevated highway on single pillar support, which is part of Dwarka Expressway Package 3, is yet to gather steam. While the initial deadline for the project was December 2020, it has now been extended by six months. The contractor, however, says the project will be delayed by at least one year.

Though construction work has resumed, officials said the shortage of labour, stringent standard operating procedures (SOPs), weak supply chain due to poor market sentiments and growing concern among the workers over the surge in Covid-19 cases have led to reduced productivity. The work is expected to catch momentum only from next month as the NHAI hopes the required number of workers will return by the month-end.

"Due to the Covid-induced disruption, only 15% of the work has been achieved so far. Even as the construction work has resumed in both packages 3 and 4, the pace is still not at the same momentum as it had in March as we were allowed to resume work with limited strength and the remaining workers returned to their home states. It is expected that they'd return by this month-end," an NHAI official told TOI. At present, NHAI and L&T are

trying to revive the project, which came to a screeching halt in March when the nationwide lockdown was announced, with only 50% of the required workforce, which is 2,000 skilled workers for both packages 3 (Basai to Delhi border) and 4 (Kherki Daula to Basai). Unable to absorb workers on the sites, the remaining

workers had returned to their home states. Besides the challenges of the acute labour shortage, the project is also grappling with the weak supply chain due to poor market sentiments. In addition to this, there's an atmosphere of fear and apprehension among the workers due to the massive surge in the

Covid-19 cases. A senior project official said, "Supply chain has improved from what it was during lockdown. But it has yet not come to pre-lockdown levels. While the economy is struggling, cases are multiplying exponentially. All this has affected everyone psychologically across the world. Our workers are no different. Right from the morning when they wear protective gears mandated by the administration to following physical distancing, we sense that they are gripped with fear. Unless the Covid-19 is tamed, getting back to previous productivity levels is least likely." Considering the unprecedented shock induced by the Covid-19, NHAI is expected to award a six-month extension to L&T. However, the latter anticipated at least a one-year delay in completion of the project. "Predicting timeline at this moment will be a folly. We are living in unpredictable times and nobody knows what set of guidelines are thrown in coming months, given the massive surge in the cases. We are trying to work day in and day out with as much capacity we are allowed. And based on rough calculations, it's safe to say that the project would be delayed by a year," said the project official.

Farmhouses being built in protected Raisina land

Gurgaon: Construction of farmhouses has restarted in the Raisina hills, which fall under the Aravalis, about a month after the district administration restored the term 'gair mumkin pahar' (uncultivable hill) in revenue records and issued demolition notices to the farmhouses already built in the area.

A visit by TOI investigation has on Thursday revealed ongoing construction at two sites in Ansals Aravali Retreat in Raisina involving clearing of land and removal of vegetation. Trees were also found to have been cut down to widen a pathway. The area in question falls under 'gair mumkin pahar' and is notified under Section 4 of the Punjab Land Preservation Act (PLPA), which prohibits tree felling. Under the Union environment ministry's Aravali Notification, 'gair mumkin pahar' is protected land where construction of buildings, roads, electrification and cutting of trees is not permitted.

Construction has started despite the issuance of show-cause notices to the owners of several hundred farmhouses in the Raisina hills by the authorities. No action, however, has been taken on the ground to remove the illegal

structures. Acting on the directions of the National Green Tribunal (NGT), the Gurgaon administration had in June replaced the term 'gair mumkin pahar', which had insidiously found its way into the revenue records and helped farmhouse owners skirt provisions of the notification, which came into force in 1992, with the original term, 'gair mumkin pahar'. According to the forest department, there are around 1,500 acres of land in the 'gair mumkin

farmhouse' category in revenue records, a significant portion of which is in Raisina. When asked, the forest department clarified that the land falls under 'gair mumkin pahar'. "As per our records, the area is gair mumkin pahar," said a forest official. According to the Haryana State Pollution Control Board (HSPCB), notices were served to the farmhouse owners and action will be initiated soon.

"Action will be taken in due course," an HSPCB official said. An environmentalist said a district level committee was set up under an October 2018 NGT order for the removal of construction and restoration of forest areas. "But instead of that happening, the forest is being cleared and construction is underway. The district administration should demolish the construction immediately and focus their monsoon planting efforts in such sites to restore the forest. The committee should set up an effective mechanism with a public mobile helpline to deal with such instances so that they can be nipped in the bud," said Vivek Kamboj, a city-based environmentalist.

Monsoon prep: 1,500 cops to be deployed at 51 spots

Gurgaon: Police have identified around 51 spots which are prone to waterlogging during monsoon, including 13 spots on the Delhi-Gurgaon expressway. Gearing up for the rains, police have prepared an extensive plan to deal with waterlogging-induced traffic jams at these spots after heavy showers. Around 1,500 policemen will be deployed at these places, along with rescue vehicles, cranes and ropes, to avoid a massive jam like that on July 28, 2016, when the city had come to a standstill as water flooded the main roads and traffic was stuck for almost a day.

"We have identified 51 waterlogging-prone spots and prepared a contingency plan to deal with rain-induced traffic jams. Large numbers of water boots, raincoats and ropes have been procured for the personnel who will be on the streets after rain," Gurgaon police commissioner KK Rao told TOI. Another 45 spots have been identified as requiring immediate repairs. Police have asked civic agencies to fill potholes in these areas.

The waterlogging-prone spots on the Delhi-Gurgaon expressway include Shankar Chowk, service road near IFFCO Chowk, Sukhrail, Signature Towers Chowk, Rajiv Chowk, Hero Honda Chowk, Narsingpur foot overbridge, service road near Khandas Mandi and Bilaspur Chowk. Areas like Fazipur Chowk, Vatika Chowk, Subhash Chowk, Baghtawar Chowk, Medanta traffic signal, Malibu Town, South City, Sun City, AIT Chowk, Atul Kataria Chowk, Dundaheera, Jawala Mill have also been identified as prone to waterlogging. These spots have been identified on the basis of previous incidents of waterlogging. The civic agency has been alerted about these spots and requested to take corrective action. Blockade in drain, defunct stormwater drains and difference in road level are some of the common reasons behind flooded streets.

Water pumps will be installed at these places in advance, while there will be spare pumps for replacement. Rescue vehicles and cranes will be placed in nearby areas and will move to the designated spots soon after rain starts.

9 areas off list of containment zones, total 100

Gurgaon: Nine areas in the city have been removed from the list of containment zones while three others have been added. With this, the number of containment zones in Gurgaon has come down from 106 to 100. While there are no changes in Pataudi and Sohna blocks, areas in Firoz Gandhi Colony have been removed from the list. The colony, which recently saw a spike in the number of Covid-19 cases, has been identified as a large outbreak region (LOR). Areas added to the list include New Harijan Basti in Harijan Chopal area in Naharpur Kasan, Gali No. 3 in Tekchand Nagar and Gate No. 2 in Sector 9, C-301, Lagoon Apartments in Nathpura; Towers 1, 4, B1, A4, B2 in Uniworld Garden-2, Sector 47; Tower G in Park View, Sector 49 are among the nine areas that have been denotified as containment zones. The difference between the containment zones and large outbreak regions is that while the former are areas where five or more Covid cases have been reported, the latter are those with 15 or more cases. The health department has given instructions to the urban primary health centres and primary health centres located in the containment zones to increase the number of RT-PCR tests. "We want to test the maximum number of people tested in the containment zones," said a health department official. While Gurgaon block now has 89 containment zones, Pataudi has four and Sohna seven. Sohna has recently seen a spike in Covid cases, due to which some of its areas have been notified as large outbreak regions. Divisional commissioner Ashok Sangwan and chief medical officer Virender Yadav visited the area on Thursday.

24k new antigen kits, Gzb sets target of 4k tests daily

Ghaziabad: The district has received 24,000 new antigen kits and has set a target of 4,000 tests daily. Chief medical officer NK Gupta said, "We have received a new lot of 24,000 antigen kits and we will be testing at least 4,000 people on a daily basis.

We intend to identify the infected people quickly to prevent the spread of the virus." He added that most patients have mild symptoms and they are recovering in L-1 hospitals. Meanwhile, district magistrate (DM) Ajay Shankar Pandey said that containment zones are their focus. "A review of these spots is being carried out periodically. Officials have been asked to pay more attention to areas from where five or more people have tested positive," he said. Officials said that through an intensive testing drive, the health department has collected 45,425 samples so far from containment zones, of which 1,090 were found to be positive, recording a positivity rate of 2.4%. So far, 620 people have been discharged from hospitals after treatment and the recovery rate is 61%. With more than 1,400 active Covid cases,

the district has a total of 362 containment zones. Of these, 173 (category 2) zones have more than one Covid case while the rest 189 (category 1) have only one case.

Besides, Loni and Khoda still remain high-focus areas for the administration with 30 and 23 containment zones, respectively. The DM added that they are working on a micro-level action plan to trace every patient in containment zones. "As part of it, several departments are working together under the direction of the incident commander.

As soon as a positive case comes, the health department is informed about it," the DM said. He added that police stations of the area are also being provided information through the portal. So far, 109 patients who have become incommunicado by turning their phones off have been traced through police surveillance. Officials said that surveillance teams in the district have surveyed 38.38 lakh people in 12.26 lakh houses in the containment zones till date, of which 1,639 had symptoms.

RAMBAUG CO-OP HOUSING SOCIETY LTD
Building No.4/5, Near Eye Hospital, Parnaka, Vasai-401201
